for iPod/iPhone

Clock display

AD752

Music from your iPod/iPhone wirelessly

With built-in Bass Reflex speakers, this sleek docking system delivers rich, deep bass and powerful sound. Its smart dock lets you charge your iPod/iPhone without the need to remove its protective casing.

Rich and clear sound

- Play and charge your iPod/iPhone simultaneously
- Bass Reflex Speaker System delivers a powerful, deeper bass
- 20 W RMS total output power

Easy to use

- Bluetooth wireless music streaming from iPod/iPhone
- Dock any iPod/iPhone, even in its case
- Auto clock synchronisation with iPod/iPhone when docked
- MP3 Link for portable music playback

PHILIPS

sense and simplicity

Docking speaker with Bluetooth
for iPod/iPhone Clock display

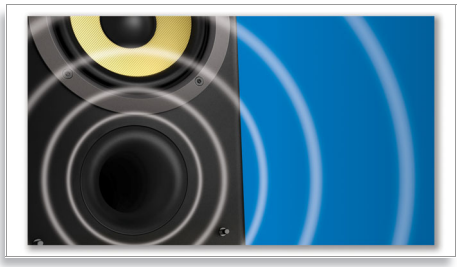
AD752/05

Highlights

Bluetooth music streaming

Bluetooth is a short range wireless communication technology that is both robust and energy-efficient. The technology allows easy wireless connection to other Bluetooth devices, so you can play your favourite music from your iPod or iPhone on your Philips audio system - conveniently, anytime you want.

Bass Reflex Speaker System



Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimise the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by causing the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a completely new dimension of deep bass.

Play and charge your iPod/iPhone

Enjoy your favourite MP3 music while charging your iPod/iPhone! The dock lets you connect your portable device directly to the Docking entertainment system so you can listen to your favourite music in superb sound. It also charges your iPod/iPhone while it plays so you can enjoy your music and not have to worry about your portable player battery running out. The Docking entertainment system automatically charges your portable device while it is docked.

Dock iPod/iPhone in its case

Smartly designed spring-loaded docking port effortlessly accommodates any iPod or iPhone, without special adapters. What's more, it works even when most protective cases are on – just dock your iPod or iPhone as it is. Now you can truly have fuss-free enjoyment of your music.

Auto clock synchronisation

When connected and docked, this docking system will automatically synchronise the clock with your iPod/iPhone within a few seconds. With this convenient feature, you do not need to set the time manually.
